

## SHL 10 M, Proline High-Lift Pallet Truck

The SHL 10 M combines the easy maneuverability of a conventional pallet truck with the ergonomic benefits of a scissor lift. For manual skid loading or unloading, the SHL 10 M provides the user with the option of working at the most comfortable height, and due to the low apron, an unimpeded working radius and excellent visibility.

- Capacity: 2,200 lb (1,000 kg)
- Fork length: 45" (1,150 mm)
- Fork width: 27" (685 mm)
- Steering wheels: 7" Ø x 2" wide (180 Ø x 50 mm) polyurethane on cast alloy with dust caps to protect bearings
- Scissor rollers: 3" Ø x 2" wide (74 Ø x 50 mm) single hard nylon
- Turning angle: 105 degrees to each side, 210 degrees total
- Lowered height: 3.3" (85mm)
- Raised height: 31.5" (800 mm)
- 17" high apron head, similar to standard pallet truck.
- High tech pump with hard chrome plated 3-stage lift cylinder and galvanized housing with internal oil reservoir.
- Quick-lift and normal low-effort lifting speeds, user selectable.
- Reinforced forks, apron and apron head for maximum strength and long life in demanding applications.
- Fork tips formed in one piece without welds for greater strength.
- Powder-coated frame and handlebar resists scuffing.
- Ergonomic handlebar is coated with resilient plastic material to remain comfortable and rust-free.
